IDENTIFIERS *Nebraska

ABSTRACT

The data contained in this report represents all of the 297,696 students, K-12, in the state of Nebraska. High levels of immunity are documented among children grades K-6. Some immunization levels of children grades 7-12 are yet below the 95 percent established as a minimum for the prevention of vaccine preventable diseases. Specifically, there remain 14,000 Nebraska students who do not demonstrate protection against measles. Statistics are provided on: (1) Nebraska school immunization levels, '83-'84 school year by Elementary, Junior High, and High School levels; (2) Nebraska school kindergarten immunization levels, 1971-1983; (3) percentages of students immunized against DPT/Td, polio, measles, rubella, and mumps by county, '83-'84 school year; and (4) percentage of students immunized in public schools with enrollment greater than 1100, '83-'84 school year. TABLE OF CONTENTS

Introduction 1

Nebraska School Immunization Levels, '83-'84 School Year by Elementary, Jr. High & High School 1

Nebraska School Kindergarten Immunization Levels 1971-1983 3

Percentages of Students Immunized by County; '83-'84 School Year 5

Percentage of Students Immunized in Public Schools with Enrollment Greater Than 1100, '83-'84 School Year 21

NEBRASKA

SCHOOL IMMUNIZATION ASSESSMENT

1983-1984

1983 was an historic year. The number of measles and rubella cases reached all-time lows. This noteworthy event is the direct result of improved immunization levels across the country. We must not become complacent in our dedication to insure that all children are protected, lest we risk reoccurrence of those horrible epidemics of years past.

Nebraska law, section 79-444.01, requires the immunization of all students or a written refusal of such immunizations. The data contained in this report represents 100% of the 297,696 students, K-12, in the state. High levels of immunity are documented among children grades K-6. Some immunization levels of children grades 7-12 are yet below the 95% level established as a minimum for the prevention of vaccine preventable diseases. Specifically, there remain 14,000 Nebraska students who do not demonstrate protection against measles.

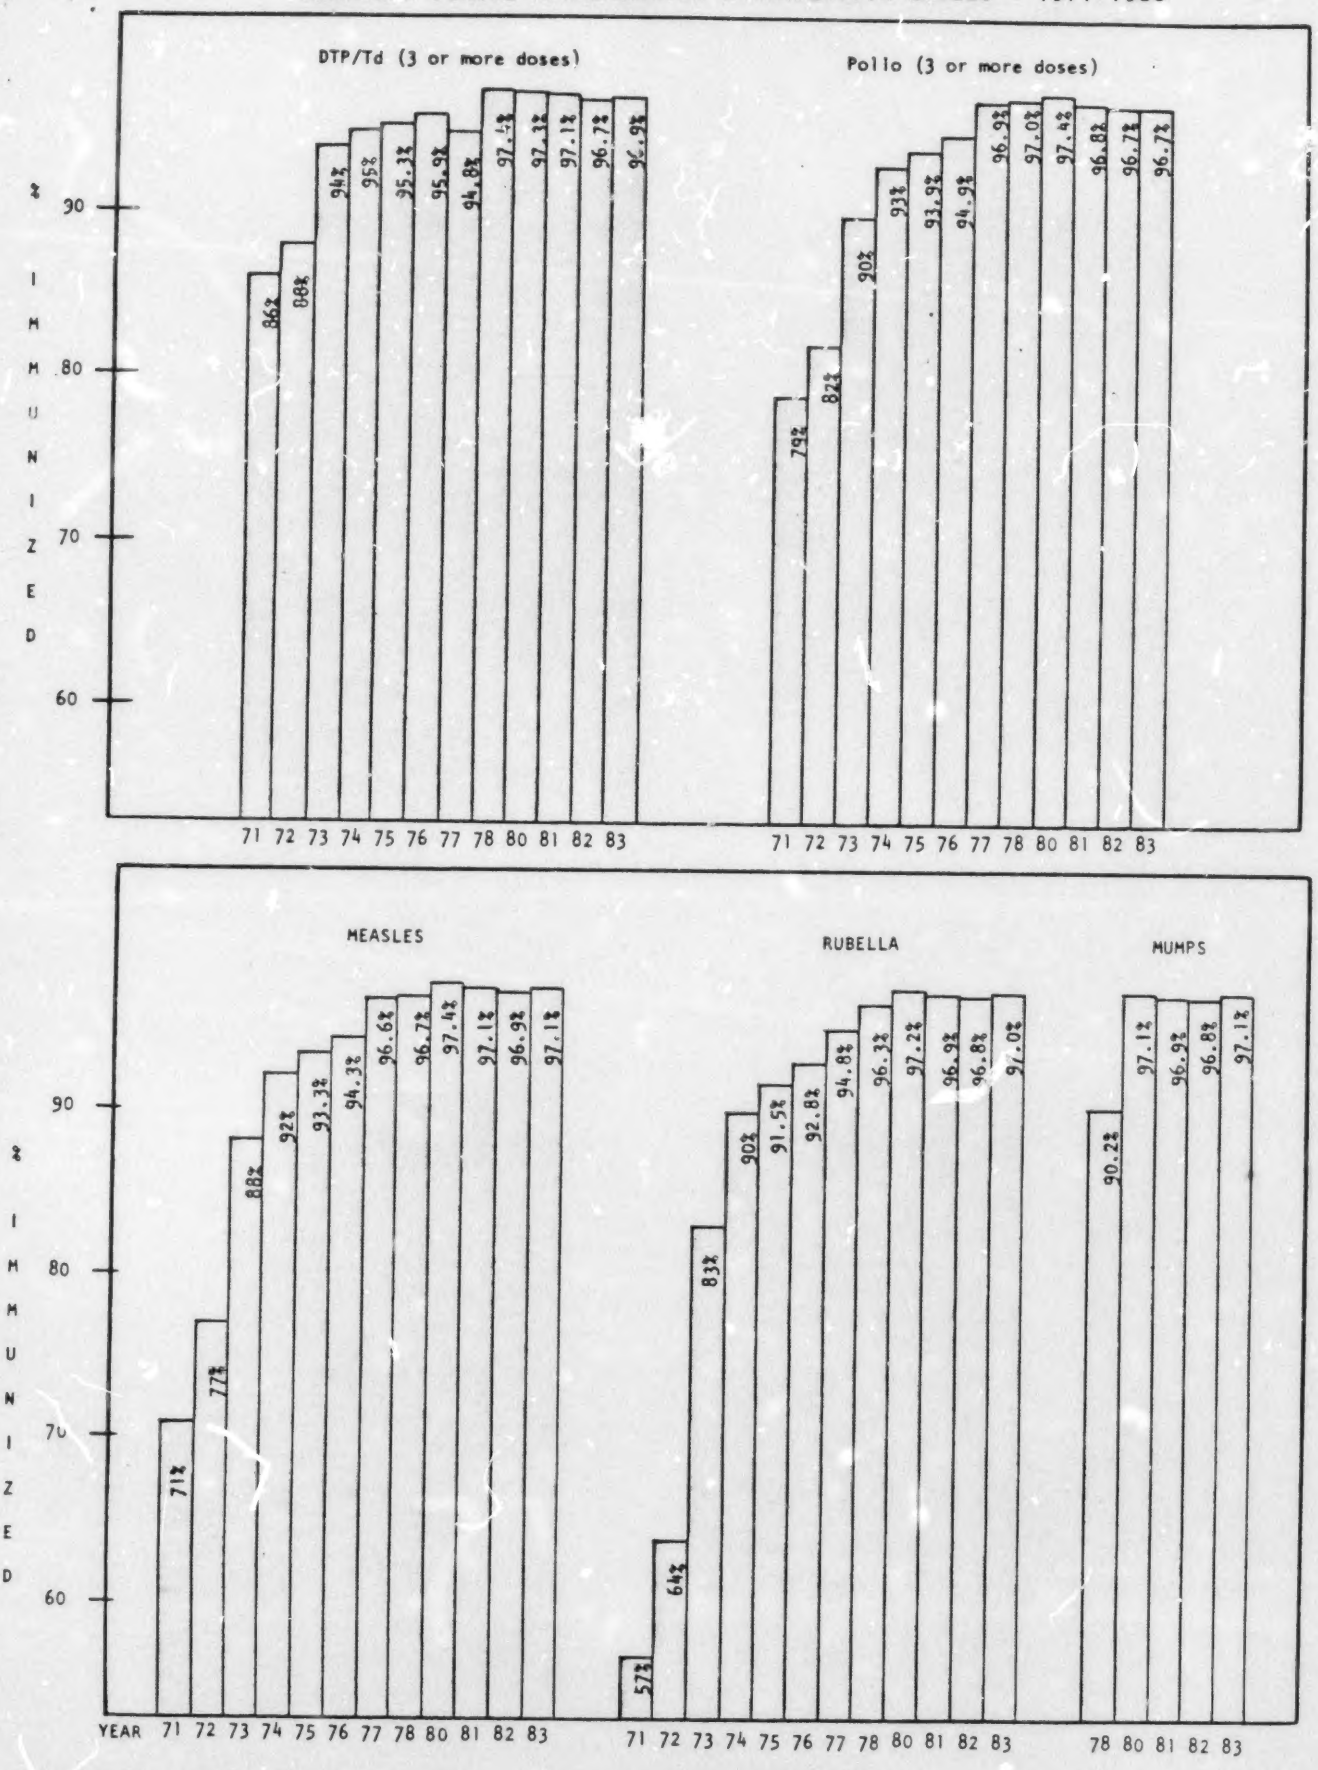
In a country which has established a clear intolerance for vaccine preventable diseases, the acceptance of children within our academic institutions who do not meet standards may assume liability on the part of those who have the ability to act. The State Department of Health is on record as an advocate of full compliance and protection against preventable disease. We will continue to assist schools in the documentation of a fully immunized school population.

NEBRASKA SCHOOL IMMUNIZATION LEVELS, '83-'84 SCHOOL YEAR
By Elementary, Jr. High & High School

Grade Level	Enrollment	% Minimally Immunized	Disease Protection Levels				
			DTP/Td	Polio	Measles	Rubella	Mumps
K-6	158,532	95.7%	97.3%	97.2%	96.8%	96.8%	96.7%
7-9	71,375	91.1%	95.8%	95.5%	95.2%	95.6%	93.4%
10-12	65,776	80.7%	92.9%	92.0%	91.7%	92.7%	85.2%
Other *	2,013	91.2%	95.8%	95.2%	95.5%	95.7%	93.8%
Total K-12	297,696	91.2%	96.0%	95.7%	95.3%	95.6%	93.3%

* In all areas of this report, 'Other' designates preschool, special education and other ungraded areas.

NEBRASKA SCHOOL KINDERGARTEN IMMUNIZATION LEVELS - 1971-1983



NOTE: Kindergarten immunization levels were not compiled in 1979
